

FLOATING FOUNTAIN

High-quality fountain

Matala high-quality fountain can be used in ponds, lakes or retention ponds. It sprays water up to 11.5ft (depends on different fountain head) into the air. The compact design houses a powerful 2,860gph pump that sits low in the water. Simply anchor the fountain and plug it in! Fountain kit includes pump, float and 1-1/2" nozzle (can offer 4 type different option heads. Please contact.)

Optional LED light kit features three 10watts (10Wx3=30W), white spotlights that brightly illuminate the fountain. Dual-timer controller automatically turns on/off the fountain and lights. Fountain and light kits include a 65.6ft power cord.

LED OPTIONAL

Features and Benefits

- Low operation cost
- Improves water quality
- Increase oxygen level
- Reduce algae
